

EC workshop ‘Building the capacity of health care systems through European cooperation in Innovation Procurement’

-

22 June 2021

- online

The Commission has just organised a workshop about innovation procurement in the field of health care that gathered a lot of participants. It provided an opportunity for information and discussion about:

- Horizon Europe and other EC funded actions that provide funding, assistance, tools or other forms of support for innovation procurement in the field of healthcare
- real-life case examples and experiences of procurers and companies from implementing innovation procurement in the field of health care.
