

## EOSC Future Call for Evaluators

European Open Science Cloud (EOSC) Future is going into high gear with the launch of a call for external evaluators. This call is seeking experts to evaluate a series of diverse grants to be awarded by the Research Data Alliance (RDA) over the course of the EOSC Future project. The call will remain open for submissions until June 2023, experts will be called on to evaluate grant applications as soon as October 2021.

@EOSC Future

To enable the co-creation of EOSC (European Open Science Cloud), via early adoption, technical and domain solution development and interoperability, RDA will be running a rich set of regular open calls. The RDA Open Calls mechanism is backed by a €1 000 000 grant earmarked for engaging with multiple stakeholders, including targeted scientific communities, technical experts and early career researchers. The calls will be complemented by a broad range of support activities, such as events, use cases, info packages, best practices, a Scientific Ambassador Network and dedicated RDA groups. These activities will enable a continual innovation workflow and engagement with science projects to support the implementation of an EOSC environment.

Experts can submit their applications via the dedicated **EOSC Future Grants Platform**, which will manage the grants application process for all calls under EOSC Future's grant fund.
