

Commission launches alliances for microelectronics and cloud technologies

The European Commission has kick-started two new Industrial Alliances: the Alliance for Processors and Semiconductor technologies, and the European Alliance for Industrial Data, Edge and Cloud.

The two new alliances will advance the next generation of microchips and industrial cloud/edge computing technologies and provide the EU with the capabilities needed to strengthen its critical digital infrastructures, products and services. The alliances will bring together businesses, Member State representatives, academia, users, as well as research and technology organisations.
