

Information session on the call for proposals for public sector open data for Artificial Intelligence

- 23 March 2022

This session will provide information on the call for proposals under the Digital Europe Programme (DEP) to support public administrations at local, regional and national level in increasing semantic, technical and legal interoperability and data portability of the High Value Datasets (HVDs).

The call for proposals was launched on 22 February 2022 and is open until 17 May 2022 17h00

Brussels time - more info on the EU Funding & Tender Portal.

High Value Datasets (HVDs) will be identified by a forthcoming Commission Implementing Regulation; they must belong to six specific categories identified in Annex 1 to the Open Data Directive: Geospatial, Earth observation and environment, Meteorological, Statistics, Companies and company ownership, Mobility.

Main requirements addressed by this call include discoverability and accessibility through one or more Member States' open data portals for free, as well as the implementation of existing or newly developed Application Programming Interfaces (APIs) to give access to datasets addressed by the proposed action.

This information session will detail the expected scope of the proposals and the requirements for participation. It will also provide a matchmaking opportunity for potential consortium partners. Participants will have the opportunity to make a two-minute pitch.

The event will take place online on 23 March 2022, from 10h00 to 11h30.
