Tenders can be submitted until 22/07/2022 (call reference CNECT/LUX/2022/OP/0011).

In 2021, the Commission proposed a **framework for a European Digital Identity** which will be available to all EU citizens, residents, and businesses in the EU. Citizens will be able to prove their identity and share electronic documents from their European Digital Identity wallets with the click of a button on their phone.

The purpose of this tender is to put in place a framework contract for the supply either in fixed price or in quoted time and means to develop and implement the European Digital Identity Wallet based on the proposal for a european digital identity framework and on the accompanying Commission recommendation for a common union toolbox.

The wallet and other relevant components will be offered to Member States and other stakeholders for implementing the requirements of the Regulation on a framework for a European Digital Identity.

The contract will cover developmental work for a sample wallet, ancillary software for its ecosystem as well as implementation support to Member States **between Q4/2022 and 2023**. The contractor is expected to develop a prototype wallet (release 1), update this prototype in two subsequent releases. The precise scope and timing of the work will be set out in the specific contracts.
