

Cyber Resilience Act - Factsheet

The Cyber Resilience Act introduces mandatory cybersecurity requirements for hardware and software products, throughout their whole lifecycle.

The factsheet sets out the main aspects of the Act, beginning with its 3 main aims.

The Act will:

- Ensure that products with digital elements placed on the EU market have fewer vulnerabilities and that manufacturers remain responsible for cybersecurity throughout a product's life cycle;
- Improve transparency on security of hardware and software products;
- Business users and consumers benefit from better protection.
