Digital Decade Policy Programme 2030

The Digital Decade policy programme 2030 will guide Europe's digital transformation.

The policy programme establishes digital targets and objectives in the realms of digital skills, digital infrastructure, digitalisation of business and of public services. The 2030 targets and objectives will be pursued through an annual cooperation cycle, which will take stock of progress along priorly defined trajectories and KPIs. The programme also creates a new framework for multi-country projects that will allow Member States to join forces on digital initiatives.

The national roadmaps will translate the EU’s vision and direction of the digital transformation in the context of each Member State.

In accordance with the Decision establishing the Digital Decade Policy Programme 2030, key performance indicators are to be used to monitor progress of the Union against the digital targets set out in that Decision.
