

Workshop on policy measures for the Greening of ICT: energy-efficient cloud computing and datacentres

-

04 December 2019

-

NH Brussels Hotel, Boulevard Charlemagne 11, 1000, Bruxelles

Participants to the workshop which is part of a study entitled “Energy-efficient cloud computing technologies and policies for an eco-friendly cloud market” will validate the results achieved in the study.

Umweltbundesamt GmbH, Austria

During the past decade, the demand for data centre services has grown exponentially as the cloud computing model is expanding. This development resulted in larger data centres, and studies predict a sharp increase in energy demand for cloud services.

The workshop participants will get insights and suggestions for better energy-efficiency through cloud computing and will be asked to validate these.

Attendance to the workshop is free. It is organised by the Umweltbundesamt GmbH, Austria.
