

Annual country reports on open internet from national regulators - 2019

The European Commission has published the annual country reports from National Regulatory Authorities (NRAs) on compliance with the provisions on open internet for the third consecutive year. The NRA reports are provided every year to the Commission and the Body of the European Regulators for Electronic Communications (BEREC). The third set of reports covers the timeframe from 1 May 2018 until 30 April 2019.

The reports will serve as a basis for BEREC's Report on the implementation of the net neutrality rules expected by the end of the year. The reports will also be used by the Commission in the next DESI Report. According to the EU open internet rules (Article 5 of Regulation (EU) 2015/2120), National Regulatory Authorities (NRAs) should closely monitor and ensure compliance with the provisions on open internet. NRAs are requested to publish annual reports and share these with the Commission and BEREC.
