
Joint declaration on processors and semiconductor technologies

The signatory Member States agree to work together in order to bolster Europe's electronics and embedded systems value chain.

This will include a particular effort to reinforce the processor and semiconductor ecosystem and to expand industrial presence across the supply chain, in order to address key technological, security and societal challenges. We agree to consolidate and build on Europe's position in areas of proven expertise and aim to establish advanced European chip design capabilities and production facilities progressing towards leading-edge nodes for data processing and connectivity.

The declaration and list of its signatories will be updated as more Member States join.
