

[The BCO Network Directory: a map of contacts for broadband actors](#)

The BCO Network initiative supports leading Member States' broadband actors in order to accelerate broadband deployment for their stakeholders. These lead actors are BCOs: Broadband Competence Offices. Established at national and regional level by Member States on a voluntary basis, BCOs advise project promoters and policy makers on the legal, technological and financial challenges of broadband projects. In order to help stakeholders identify and contact their national BCOs, the BCO Network has launched a Directory mapping the national BCOs and providing direct contact details.
