

Targeted consultation on the availability of works other than printed works in formats accessible for persons with disabilities within the internal market

- Opening: 11 February 2021

-

Closing: 30 April 2021

The purpose of this targeted consultation is to collect information and data on the availability of certain copyright protected works, in particular works other than printed works (e.g. films, photos or music), to persons with disabilities. The Commission is carrying out this exercise as part of the preparation for a report foreseen by Article 9 of the Marrakesh Directive (EU)2017/1564. The consultation is targeted at persons with disabilities and organisations acting on their behalf, rightholders, content producers, distributors, service providers, broadcasters and educational institutions.

You can provide your feedback by filling in the online questionnaire by Friday, 30th April 2021. The targeted consultation is available in EU Survey, also in accessible format, in three languages (English, French and German) but you can answer in any of the EU official languages.
