

Finland and Lithuania join European network of innovation procurement competence centers

KEINO (FI) and MITA (LT) have recently joined the procure2innovate European network of national competence centers on innovation procurement. This network aims to boost capacity building on innovation procurement across Europe.

Procure2innovate is creating an EU wide network of national competence centres on innovation procurement. The network is spearheaded by five countries that are reinforcing existing national competence centers (Germany, Austria, Netherlands, Spain, Sweden) and five countries that are setting up new competence centers (Portugal, Greece, Ireland, Estonia, Italy). Together they invite others to join.
