MIE 2015: 'Digital healthcare empowering Europeans'

• 27 May 2015 - 29 May 2015
Madrid, Spain

The Medical Informatics Europe (MIE) event is inviting contributions in the form of papers, posters (classical and digital), workshops organized by EFMI Workgroups, panels and special events: EU Projects, Young researchers, Village of the Future (innovations).

So far 25 MIE events have been organised by the national members and EFMI gathering between 600-800 participants from all over the world.

The chosen theme of MIE2015 is "Digital healthcare empowering Europeans". This theme aligns with collective efforts of multiple parties; Patients, care providers, system developers, researchers and ultimately the entire population of Europe to join in to enjoy benefits from the potentialities in digitization of health information.

For MIE 2015 participants are invited to submit contribution on a broad range of topics, sharing your latest achievements in biomedical and health informatics. Deadline: 17 November 2014.
Organiser
EFMI, the European Federation for Medical Informatics
