

## Europe's Digital Decade: Commission sets the course towards a digitally empowered Europe by 2030

The Commission recently presented a vision, targets and avenues for a successful digital transformation of Europe by 2030. This is also critical to achieve the transition towards a climate neutral, circular and resilient economy. The EU's ambition is to be digitally sovereign in an open and interconnected world, and to pursue digital policies that empower people and businesses to seize a human centred, sustainable and more prosperous digital future. This includes addressing vulnerabilities and dependencies as well as accelerating investment.

Today's Communication follows President **von der Leyen**'s call to make the next years Europe's 'Digital Decade'; responds to the European Council's call for a 'Digital Compass'; and builds on the Commission's digital strategy of February 2020.
