

## Stakeholder Cybersecurity Certification Group

The Stakeholder Cybersecurity Certification Group was established to provide advice on strategic issues regarding cybersecurity certification.

### About the Group

The Stakeholder Cybersecurity Certification Group's (SCCG) overall mission is to support and facilitate the strategic issues regarding the European cybersecurity certification framework. Upon request, the Group will advise ENISA on general and strategic matters concerning ENISA's tasks relating to market, standardisation and cybersecurity certification.

The Group will also assist the European Commission in the preparation of the Union's rolling work programme referred to in Article 47 of the Cybersecurity Act. It will issue an opinion on the Union's rolling work programme and in urgent cases, provide advice to the Commission and the European Cybersecurity Certification Group (ECCG) on the need for additional certification schemes not included in the Union's rolling work programme.

In line with the Cybersecurity Act, the European Commission, together with ENISA, will co-chair the meetings of the Stakeholder Cybersecurity Certification Group. ENISA will also provide the secretariat of the Group. In principle, the group should meet three times per year.

The European Commission is making available meeting agendas and minutes.

# Members

The SCCG is composed up to 50 members from various organisations, including, inter alia, academic institutions, consumer organisations, conformity assessment bodies, standard developing organisations, companies and trade associations and other membership organisations active in Europe with an interest in cybersecurity certification.

The Group includes members appointed from the European Standardisation Organisations, such as CEN— European Committee for Standardisation, Cenelec— European Committee for Electrotechnical Standardisation, ETSI— European Telecommunications Standards Institute. Also involved in the Group are International Standardisation Bodies such as the International Organisation for Standardisation (ISO), the International Electrotechnical Commission (IEC) and the International Telecommunication Union (ITU), the European co-operation for Accreditation (EA) and the European Data Protection Board (EDPB).

Trade and Technology Council: Inaugural meeting  
agrees on important deliverables and outlines  
areas for future EU-US cooperation

At the first meeting of the Trade and Technology  
Council (TTC) in Pittsburgh, the EU and the US  
agreed on concrete deliverables and outlined the

future scope of work. Notably, the EU and the US committed to cooperating closely on shared priorities such as export controls, foreign investment screening, critical and emerging technology standards including Artificial Intelligence, and secure supply chains including on semiconductors. They also agreed to work together on important global trade issues, such as the challenges posed by non-market economies and trade-related climate and environment

The European Cybersecurity Competence Centre and Network is now ready to take off

The regulation establishing a new Cybersecurity Competence Centre and a Network of National Coordination Centres has entered into force this week. The Cybersecurity Competence Centre, which will be located in Bucharest, will contribute to strengthening European cybersecurity capacities and to boosting research excellence and the competitiveness of the Union's industry in the cybersecurity field.

PRESS RELEASE | 23 June 2021

EU Cybersecurity: Commission proposes a Joint Cyber Unit to step up response to large-scale security incidents

The Commission has laid out a vision to build a new Joint Cyber Unit to tackle the rising number of serious cyber incidents impacting public services, as well as the life of businesses and citizens across the European Union. Advanced and coordinated responses in the field of cybersecurity have become increasingly necessary, as cyberattacks grow in number, scale and consequences, impacting heavily our security. All relevant actors in the EU need to be prepared to respond collectively and exchange relevant information on a 'need to share', rather than only 'need to know', basis.
