
DigitALL Public conference - Working to make our lives better

-

20 April 2021-22 April 2021

The DigitALL Public conference is the closing event of the Connecting Europe Facility (CEF) Digital and the Interoperability solutions for public administrations, businesses and citizens (ISA²) programmes. Together with the Member States, these programmes have helped build cross-border public services for citizens, provided free interoperable solutions to companies and connected various organisations in different sectors. The DigitALL Public conference will celebrate the next step in this journey while looking ahead towards Europe's digital future.

European Commission

This on-line conference will include inspiring speakers from European and international Institutions, Member States and industry. We will look at the successes in the digital transformation of public services across the EU and celebrate the beginning of the new Digital Europe Programme.

During this three-day event you will have the unique opportunity to hear and engage in discussions on Innovation and GovTech, Interoperability, Open Source, Smart Cities, Trust and Security, among others. You will learn about policy priorities, lessons learned and other inspiring topics, reflect on ways to implement digital solutions and understand how we can all better work together towards Europe's digital future.
