

## Call for tenders open for deploying cloud services for the European Open Science Cloud

The OCRE consortium of research and education networks from 48 countries are inviting interested bidders to submit offers for their IaaS+ (Infrastructure as a Service) procurement. This aims to deploy commercial cloud services to empower the research capabilities of the European research community. This OCRE procurement exploits the results of the past HNSciCloud (Helix Nebula Science Cloud) pre-commercial procurement in which such type of innovative cloud based solutions were developed and tested for the European Open Science Cloud. Deadline for submission of offers: 2 June 2020.
