Rolling plan for ICT standardisation

The EU rolling plan provides an overview of preliminary and complementary ICT standardisation activities undertaken in support of EU policy activities.

The 2020 rolling plan for ICT standardisation was drafted by the European Commission in collaboration with the European Multi-Stakeholder Platform on ICT Standardisation.

The plan is updated annually. It lists all the topics identified as EU policy priorities where standardisation, standards, or ICT technical specifications ought to play a key role in the implementation of the policy.

It covers technologies of 'horizontal importance'. These are technologies whose application has a wide impact across different technical fields, in the context of ICT infrastructures and ICT standardisation.

You can consult online the COVID-19 rolling plan and the 2019 rolling plan.

If you have any questions or suggestions please contact the secretariat.
