Rolling plan for ICT standardisation

The Rolling Plan results from an annual dialogue involving the Commission services and a wide range of interested stakeholders represented in the [(https://digital-strategy.ec.europa.eu/en/policies/multi-stakeholder-platform-ict-standardisation)European multi-stakeholder platform on ICT standardisation (MSP) (https://digital-strategy.ec.europa.eu/en/policies/multi-stakeholder-platform-ict-standardisation)](https://digital-strategy.ec.europa.eu/en/policies/multi-stakeholder-platform-ict-standardisation).

The plan is updated annually and attempts to list, in a non-prioritised manner, all known areas where ICT standardisation could support EU policy and regulatory objectives. It also details the requirements for ICT standardisation, and defines actions and to achieve them.
