Europe's Digital Progress Report 2017 (New)

The Europe's Digital Progress Report (EDPR) report combines the quantitative evidence from DESI (Digital Economy and Society Index) with country-specific policy insights, allowing us to keep track of the progress made in terms of digitalisation by each Member State and providing an important feedback loop for policy-making at EU level.

Digital Economy and Society Index 2017

Croatia ranks 24th in Digital Economy and Society Index (DESI) 2017. Croatian citizens are above average users of the Internet and their digital skills are steadily progressing. The use of digital technologies by enterprises is close to average. Digital Public Services are slowly improving. However, Croatia's low performance in Connectivity could slow down the further development of its digital economy and society.
