

# Germany in the Digital Economy and Society Index

The European Commission has been monitoring Member States' digital progress through the Digital Economy and Society Index (DESI) reports since 2014. As of 2023, and in line with the Digital Decade Policy Programme 2030, [DESI is now integrated into the State of the Digital Decade report](https://digital-strategy.ec.europa.eu/en/library/country-reports-digital-decade-report-2023) (<https://digital-strategy.ec.europa.eu/datasets/desi/charts>) and used to monitor progress towards the digital targets. You can also specifically refer to the [country reports](https://ec.europa.eu/newsroom/dae/redirection/document/88702) (<https://digital-strategy.ec.europa.eu/en/library/country-reports-digital-decade-report-2023>)

## Europe's Digital Progress Report 2017

The EDPR report combines the quantitative evidence from DESI (Digital Economy and Society Index) with country-specific policy insights, allowing us to keep track of the progress made in terms of digitalisation by each Member State and providing an important feedback loop for policy-making at EU level.

# Digital Economy and Society Index 2017

Germany ranks 11th in DESI 2017. Germany is a leader in spectrum assignment. Germans are above average users of the Internet and their digital skills are progressing well. German citizens and companies are actively approaching the opportunities of eCommerce. However, Germans are reluctant to subscribe to fast broadband. Moreover, with only 19% eGovernment users, the greatest challenge is to improve the online interaction between public authorities and citizens.
