

Calais: The Netherlands' first CEBF-funded broadband project

Calais is the first Dutch broadband project funded by the Connecting Europe Broadband Fund (CEBF). The province of Groningen approached CEBF when they recognised their need for additional funding as well as a more strategic partner to reach the most remote areas. The resulting partnership will bring NGA access to over 100,000 inhabitants, combining fibre with a fixed wireless network for the hardest-to-reach areas. In this video, Jan Peter de Groot, Rodin Group CEO, explains that the pandemic made it very clear that people in all areas need to be able to “connect with the whole world”.

BCO-SF

First project funded by the Connecting Europe Broadband Fund in the Netherlands

This video is part of the European Broadband Competence Offices (BCO) Network's programme promoting awareness of good practices in broadband projects as well as EU broadband funding and policy. The programme includes a series of videos, articles and publications accessible through the BCO Network portal.
