

Reporting on Human Brain Project Platform Release

End of March, the Human Brain Project (HBP) release event presented the first components, services and tools of 6 ICT Platforms to the scientific community. These HBP Platforms are designed to help researchers to advance faster and more efficiently, by sharing data and results, and exploiting advanced ICT capabilities.

HBP is inviting scientists everywhere to work with the HBP Platforms and give feedback. This will help HBP to improve their functionality, and hence their value to society.

You can watch the **morning session**, when presentations & demos were given for the scientific community:

<https://www.youtube.com/watch?v=2XXz2quUWFQ>

In the **afternoon** the general public and invited press was addressed. You can watch the press release & brief presentations on the HBP Platforms given, at

<https://www.youtube.com/watch?v=hb7Ccwmlcs>

You can find on the HBP dedicated webpage all info about the event and related ICT Platforms:

- full press release
- how to access the HBP Platforms via the HBP Collaboratory
- programme of the event
- press kit & images
- contact
