

[Meeting of the Multistakeholder Forum on Disinformation](#)

In its Communication "Tackling online Disinformation", the Commission puts forward an action plan and self-regulatory tools to tackle the spread and impact of online disinformation in Europe and ensure the protection of European values and democratic systems. One of the actions is to convene a Multistakeholder Forum on disinformation to develop a Code of Practice to tackle online disinformation by July 2018. The Forum met on the 29 May.

The Forum includes representatives of online platforms, the advertising industry and advertisers, as well as academics, media and civil society organisations. The Forum is comprised of two sub-groups; a Working Group, and a Sounding Board.

The Code of Practice to be developed by the Multistakeholder Forum should lead to a measurable reduction of online disinformation by addressing the following 5 main areas:

- Ensuring transparency of sponsored content;
- Introducing measures to identify and close fake accounts and to tackle the issue of automatic bots;
- Providing greater clarity about the functioning of algorithms and enabling third-party verification;
- Making it easier for users to discover and access different news sources representing alternative viewpoints;
- Enabling fact-checkers, researchers and public authorities to continuously monitor online disinformation.

The final Code of Practice is expected in September.
